1)Login - Student profile, password Bmsce123
2)open home folder
3)open Cadwork folder
4)open Digital folder
5)create new folder with name as 1BF24ECXXX
6)create new folder inside the above folder as sim
7) inside sim create 3 folders namely rtl , tb, work
8)Go back to digital and then open terminal

- ls -a
- csh
- source .cshrc
- which ncverilog
- cd USN/
- ls
- cd sim/
- ls
- cd rtl/
- gedit filename.v(write code for .v extension and then at top right side save then quit)
- ls -a
- ncverilog +access+r filename.v
- cd../tb
- ls

●gedit tb_filename.v (write testbench for .v extension and then at top right side save then quit)
●cd../Work/
●ncverilog +access+r ../rtl/filename.v ../tb/ tb_filename.v
●ls
●simvision filename.vcd
Now at left side Click testbench then click a small waveform icon at top right side .
We get waveform now demonstrate working and explain waveform behaviour.
